

## **MapPro SDK State files Naming Convention**

The state files (in the States folder of the SDK distribution DVD) contain all the detailed (street-level) data for each state. The file naming convention varies with the version of the SDK, however, the state and province numbering remains the same. In order to facilitate developers who ONLY want to distribute certain state files, or are trying to debug problems with their installation, etc. a complete listing of the state/province file numbers is provided below. What is also provided is a brief example of the file-naming convention used.

### **(a) MapPro50 SDK**

**02.ZPG**

Where:       **02** - The state file #, see listing below

So, in this example, this is referring to the state file for Alaska (AK).

### **(b) MapPro60 SDK, MapPro71 SDK, MapPro71 Rel.1 SDK, MapPro71 Rel.2 SDK**

**04G06Q1.ZPG**

Where:       **04** - The state file #, see listing below

**G06Q1** - Varies with version of the data set

So, in this example, this is referring to the state file for Arizona (AZ). Note that some data files (and corresponding file numbers) were NOT available in MapPro50, MapPro60 or even early releases of MapPro71 of the SDK.

State, Province Abbreviation	File Number	State, Province Name	Country
AL	01	Alabama	USA
AK	02	Alaska	USA
	03	N/A	
AZ	04	Arizona	USA
AR	05	Arkansas	USA
CA	06	California	USA
	07	N/A	
CO	08	Colorado	USA
CT	09	Connecticut	USA
DE	10	Delaware	USA
DC	11	Washington, DC	USA
FL	12	Florida	USA
